RE: Town of Beech Mountain
State Reserve Project
Proposed \$2,000,000 Loan
2018 Collection System Rehabilitation Project
Project No. E-SRP-W-17-0104

To Whom It May Concern:

In accordance with Section 120-157.2(a) of the General Statutes of North Carolina as amended, the Town of Beech Mountain hereby notifies you of its intent to enter into a State Reserve Project Loan with the Division of Water Infrastructure in the North Carolina Department of Environmental Quality subject to the approval of the Local Government Commission, in the expected amount of \$2,000,000.

Purpose of Project: In order to reduce inflow and infiltration (I/I) in the collection system and thereby reduce the risk of permit violations at the Pond Creek WWTP, the proposed project will rehabilitate or replace approximately 7,800 LF of 8" gravity sewer and 9,600 LF of 12" gravity sewer. The improvements will be located in the Charter Hills Road area of town because a 2001 engineering study indicated that this part of the collection system is the highest contributor of I/I to the Pond Creek WWTP.

Scope of Project: The project will rehabilitate or replace approximately 7,800 LF of 8" gravity sewer and 9,600 LF of 12" gravity sewer. The improvements will be located in the Charter Hills Road area of town.

Debt Requirement of the Project: The projected capital cost of the 2018 Collection System Rehabilitation Project is \$2,000,000, all of which is to be debt financed.

Means of Financing the Project: The project is to be financed through a State Reserve Project (SRP) loan at a maximum interest rate of 1.82% over 20 years, subject to availability and conditions of the funding program.

Sources of Repayment for the Project: The SRP loan principal and interest will be repaid using funds collected by the Town from its current customer base, through normal fees. Increases in these normal fees may be necessary in the near future but we anticipate such fees to remain below 4% of the Median Household Income for our service area (for those customers using 5,000 gallons per month or less).

If more specific information is needed, please do not hesitate to contact me at the address above or to contact our consulting engineer, Benjie Thomas of West Consultants, at:
